\\ NEED SOMETHING MORE COMPLEX?

Wide Span Sheds has partnered with Specialised Steel Buildings to deliver solutions for those projects that fall outside the realm of standard cold-formed steel.

Specialised Steel Building projects use an advanced cold formed framing system that permits one-off designs specifically for your project. They also have the capacity to create bespoke designs that combine steel with other building materials including concrete and fabricated sections. All cold formed framed buildings are manufactured in Australia from premium BlueScope Steel.

This system offers you cost effective solutions and exceptional value including:

- ✓ Flexible design parameters with multiple layout combinations
- ✓ Heights up to 20 metres, clear spans up to 45 metres and lengths beyond 200 metres
- ✓ Extended side wall openings up to 15m
- ✓ Variety of optional accessories
- ✓ Building design specifically to suit your needs and site
- ✓ Fully compliant with the National Construction Code

- ✓ Fast turnaround (generally 4-6 weeks)
- ✓ Advanced engineering principles
- ✓ Low up-front investment
- ✓ Significantly faster construction time frames
- ✓ Inherent strength and resistance to natural anomalies

Call **Jeremy Harding** to discuss your next **Specialised Steel Building** project:

ZINCALUME® ROOF

FROM \$193,100 + GST

COLORBOND® ROOF

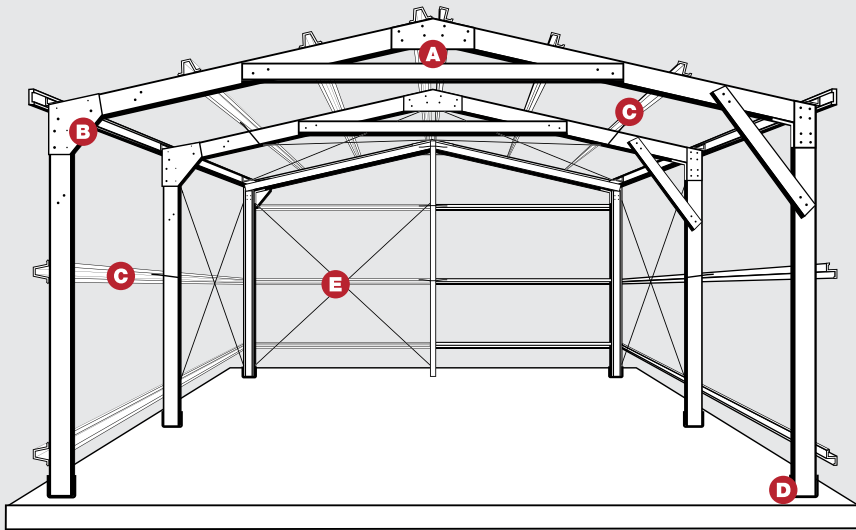

Suitable for Regions A and B, TC2.5 No Shielding. Standard building no alterations. Custom designs available. Price excludes delivery to site. Includes certified engineering design, all structure, purlins, cladding, bolts and screws, cast in brackets for hold down. Excludes downpipes, footings design.

SSB
SPECIALISED STEEL BUILDINGS

DISCOVER THE WIDE SPAN SHEDS DIFFERENCE

A APEX SYSTEM

- Apex bracket to full depth of the rafter 'C' sections with full width return flanges for strength
- Apex brace (collar tie in tension) is vital in the construction process and aids greatly in maintaining structural integrity in high winds

B HAUNCH BRACKET

- Designed to strengthen the rafter-over-column haunch joint and prevent axial torque
- In larger buildings knee braces are provided to strengthen the haunch connection

C PURLINS AND GIRTS

- 450MPa or greater BlueScope Steel
- Option of Top Hat or fully bolted Z purlins and girts
- 10-15% overlap on purlins and girts
- Larger overlaps add significant strength

D FOOTING FIXING

- A number of fixing methods are available

E BRACING

- Cross bracing and fly bracing

CORODEK®

METROCLAD®

TRIMCLAD®

STYLISH & SPACIOUS D.I.Y. STEEL KIT HOMES

We pride ourselves on providing easy to build D.I.Y. Steel Kit Homes at an affordable price. Perfect for the owner builder or project manager.

KIT HOMES – AN AFFORDABLE HOUSING SOLUTION

Wide Span Homes offers a range of quality steel home kits at competitive prices. These homes are supplied to you (just as the name suggests) in kit form – and are perfect for the owner builder or project manager. We supply the BlueScope Steel components for the shell or structure of your new home, enabling you to source the rest (all fixtures and fittings) without having to pay a builder's margin.

WHAT IS A BUILDER'S MARGIN?

The professional builder provides a built service; they are most likely NOT a manufacturer or distributor of building products. When a professional builder sources and supplies the building products on your behalf, then a builder's margin is added for the procurement. Eliminating these margins is one way that you can save money.

BENEFITS OF A STEEL KIT HOME

Our frames are manufactured from TRUECORE® steel, with COLORBOND® steel wall cladding and ZINCALUME® roofing (as standard). Steel is extremely durable and more likely to withstand fierce weather and climate. While cold-formed steel is very strong it is also a lightweight material, making it easy for transportation and labour (which can reduce freight and labour charges).

ENGINEERING AND FLOOR PLANS

This range is designed and engineered in accordance with the Building Codes of Australia and to endure Australia's unpredictable weather. Our range of kit homes include all engineering plans, floor plans and elevations for you to submit to council.

18 *Peace of mind
Guarantees*

...we've got you covered!

Call **1300 94 33 77** today!

BEING AN OWNER BUILDER

If you're ready to take on the challenge of building a home, or at the very least manage the contractors completing the project, you have the potential to save thousands of dollars by purchasing a Wide Span Homes kit building. Some benefits include:

- Control of project and budget – you are not limited by the builder.
- Flexibility – last minute changes are possible.
- Selecting tradesman – you are free to use who you want.
- No waiting time – you can work to your own schedule and not a builder's.
- The final result is the home you want.
- No builder's margin.

TERMITES DON'T LIKE STEEL!

Termites are a big problem in Australia and whilst there is no way to completely eradicate this problem, you can reduce the termite temptation with a steel framed home. Unlike timber framed homes, termites will not eat through steel. You can be rest assured the structural integrity of your home will not be tainted by these pests. Wide Span Homes recommends that you arrange regular termite inspections for your home, as other areas may still be prone to termite infestation.

INTERESTED IN BECOMING AN AGENT?

- ✓ EXPAND YOUR BUSINESS
- ✓ INCREASE YOUR PROFITS
- ✓ IMPROVE YOUR LIFESTYLE

We are currently expanding our network of Agents and are looking for established businesses in regional areas with client bases within the rural industry.

We are offering a passive income, with no need to hold stock or inventory or even the need to create invoices, we do all that for you! Not all areas or towns have agents in them, contact us to check if we would like representation in your area.

Contact us on **0490 033 888** or **newagents@sheds.com.au** for more information on how to get started.

Catalogue T&C's: Prices published in this catalogue are pre-promotional, further discounts will be applied at time of quotation - or unless otherwise stated. All promotional pricing is valid for 14-days from date of quotation unless stated otherwise on quote letter. Offer ends 30th June 2016. North Queensland and Northern Territory prices will alter due to roller door freight prices. Pricing may alter for different areas. All prices quoted include GST. A delivery fee may apply. All buildings comprise of steel building kit only with a full set of plans and does not include downpipes, windows, glass sliding doors. Products may vary slightly in different areas. Buildings are designed and priced on the following basis: All steel kit homes are N2, Class 1a; All other buildings are Class 6, 7, 9 or 10a. Design conditions are dependant on the style and size of the building. All images are representational only and may include optional extras not included in the standard building price. Whilst every care is taken in the accurate publishing of prices and goods, Wide Span Sheds reserves the right to correct any errors or misprints at any time without notice. Errors and omissions excepted. Local agents are independent agents. Please visit www.sheds.com.au/termsandconditions for latest product information and alterations to our conditions.
